Layout :

- A screen is hung in the middle of the wall.
- The screens are distributed over the entire floor.
- A motion sensor is suspended from the ceiling of the room.
- One spot is positioned facing the center screen.
- One spot is positioned to light the card on the wall.
- The computer is hidden.
- An explanatory card is placed at the entrance.

*The software is programmed to automatically activate and close according to the exhibition times.
